

Colocation Center

T1 Company LLC

Switch & Data Colocation Center.

T1 Company provides data center space whether your requirements are for 1u server, 1/4 rack or a full rack. With standard features of Managed AC PDUs, Network Connectivity, dedicated VLANs, Security Key Card Access, temperature controlled environment and IP access. At our data center, your equipment will be connected to a 1000Mb Ethernet connection to our core routers through a 1000Mb switch providing superior network connectivity. We also provide access to graphs of bandwidth usage to allow you to see real time data information.

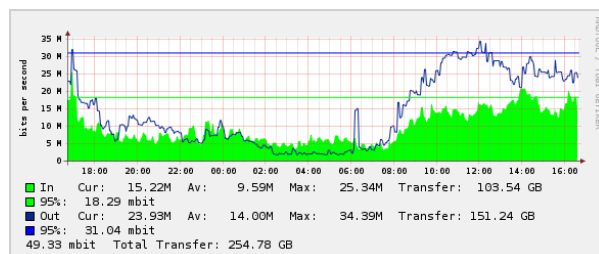

Colocating your servers with **T1 Company** provides your company with a unique ability. We provide data connectivity to your office via T1, DS3, OC3 or Ethernet services which terminates at our colocation cage. This allows a high level of availability to your servers without traversing the internet or cloud. The **T1 Company** peers with Qwest Communications, Level3 and other carriers to provide a high level of speed and redundancy for outside internet access.

Other features are multiple Ethernet drops terminating at different switches to provide redundancy on our switch stack. Security includes Lobby, real-time surveillance, and key card access to the facility. **T1 Company's** colocation cage is also a locked area with surveillance throughout the entire data center. Multiple AC circuits per rack are also available up to 30 amps per circuit. DC power can also be arranged.

The data center is a raised floor design with 14 foot ceilings. A/C is under floor and delivered to each rack by cross drilled tiles. Many other options are available or if you have a special need please let us know and we will be happy to discuss

Look no further for your colocation needs.

Contact the **T1 Company** sales department for questions and pricing.
216-255-3098 option 3, or sales@t1co.com.
